

# Advisory Services

Use Allied Telesis expertise to put you in the lead.

- ✓ **Partner with us** to make it easy to design your new network
- ✓ **Be certain** your network supports your organization's goals
- ✓ **Maximize return** on your networking equipment
- ✓ **Avoid issues** that could put your organization at risk

With our professional services, Allied Telesis consultants will make sure your network **helps your business grow**. We have the expertise you need.

## Why choose our advisory services?

Benefit from our broad knowledge

Our engineers have experience across a range of industries and customers, both big and small.

Reduce risk

Without expertise, many digital transformation projects fail.

Use our expertise

We focus on your network, giving your IT team time for business-enhancing projects.

Get skilled help effortlessly

Save the time and cost required to build an in-house IT team.

From planning and design to implementation and operations, our Advisory Services provide everything you need. Our certified engineers offer vendor-neutral expertise with equipment from Allied Telesis and other companies.

As well as providing professional services for scheduled projects, our On-Demand service provides a flexible, on-request option, for tasks that do not require prior planning or require the need for professional installation.

## Network Design Services

Our consultants design a proven solution tailored to your specific requirements, removing the risk of costly network redesigns and missed deadlines. We will provide all the information you need to successfully create your new network, including:

- **A business and technical project overview**, including key challenges and requirements.
- **A description of the proposed solution**, including topology and network architecture, network devices, technologies, features, and protocols.
- **Procedures** to implement your network in line with best practice.
- **Information** you need to manage your network effectively.

## Assessment Services

The assessment service provides access to Allied Telesis experts, to optimize, plan extensions or resolve issues on your network. Our consultants will help you prioritize business goals for productivity, revenue, market share and user satisfaction. Options include:

- **Network Auditing** – We will analyze your existing network in detail, including architecture and a physical audit of your network assets. Our report will highlight the strengths and weaknesses of your current network and the potential impact of any changes.
- **Issue Auditing** – We will work together with you, and where applicable, a third party supplier, to solve a complex technical issue in your infrastructure.
- **Tailored Workshops** – Custom sessions to work with your team so we can ensure your network will meet your evolving needs. Our experts share their wide ranging knowledge in security, resiliency, video, voice, Quality of Service, Layer 3 and other technologies.

Our service plans are flexible and can be customized to meet your needs. [Contact Sales](#) to discuss your requirements.
